The previous list represents only those cases in which I have been designated the architectural expert. My additional experience as a project manager on numerous Perry Consulting Group, Inc. cases from 2000 – 2005 is not included, which involved all aspects of interior and exterior investigations, photo documentation and organization, analysis of others documents and the preparation of expert reports, as well as participation in mediations. In addition to my expert witness cases at present, I am also actively involved in my on-going architectural practice.
